Ministry of Water Resources & Irrigation
Juba
Central Laboratory for Water Quality

To: ASIMO - South Sudan

24th Feb 2021

Re: GRIFAID (Family and COMMUNITY WATER TREATMENT TECHNOLOGY).

This is to certify that the Central Laboratory for Water Quality Monitoring – Ministry of Water Resources and Irrigation had carried out tests on the GRIFAID (community water treatment technology), and the result is found to be highly meet the water quality requirements as per WHO and the South Sudan Drinking Water Quality Guidelines (SSDWGL).

We therefore, recommend the use of the technology at households in rural communities and during emergencies.

Yours faithfully,

Samuel Wani Onesimo
For/ Manager Central Laboratory
